**RE: BNR21-0604 Dana Point Harbor, 30 ft Gangway Deferred Submittal**

Dear Roshanak,

Please find attached drawings and calculations for the 30 ft gangway for use on the Dana Point Harbor Revitalization Project (permit number BNR21-0604). Note that this 30 ft gangway will be used in (36) locations on this project. This is the non-ADA gangway. A separate submittal will be provided covering the 80 ft ADA gangway.

The gangway was designed by Grantham Engineering and will be fabricated by Topper Industries. I, as the engineer of record for the project, have reviewed Grantham Engineering's drawings for overall conformance with the rest of the project components, including the attachment to the existing seawall.

Sincerely

Craig Funston, S.E.  
VP of Engineering  
Bellingham Marine
